

The Music Studio — Quick Pitch

LS50H

LS70H

Music Studio speakers bridge the gap between high-end home audio and home décor. Instead of looking like a traditional speaker, they have a minimalist design that feels more like art or a piece of furniture rather than a speaker that stands out.

They sound just as good as they look, and with a dedicated app that's easy to use, you can enjoy seamless control. With Wi-Fi support for high resolution audio, you can link them up in groups to play your music seamlessly throughout the home.

Beyond music, they sync with the speakers in newer Samsung TVs¹ giving you a full wireless surround sound setup that looks good in any room.

It's an easy way to upgrade your sound without having to change your style.

Top 3 reasons

Modern Design

These speakers look more like high-end art than a traditional speaker.

The minimalist shape and dot design blends into your décor, giving you premium audio without adding tech clutter.

Multi-Dimensional Sound

Room filling sound from a single unit, or link up to 10 together for whole home audio. They sync wirelessly with Q-Symphony¹ compatible Samsung TVs creating a surround sound experience without messy wires and cables.

¹Q-Symphony requires a compatible 2020-2026 Samsung TV. Please refer to [samsung.com](https://www.samsung.com) for more information.

Mastered Performance

A speaker smart enough to tune itself to your specific room.

By automatically adjusting the bass and clarity to fit your unique space, your audio stays balanced wherever you place it.

Immersive Waveguide
- Hi-Fi & Spatial Audio
Streaming
- 24bit/96khz Music
Support

* The features listed above include step-up differences between models only.

Samsung Only Experience

AI Dynamic Bass Control

Patented Samsung technology that constantly monitors your sound to adjust the bass in real-time giving you deep, punchy lows that feel powerful without buzzing or distortion.

Waveguide Technology

Patented Samsung technology that pushes sound out wide across the entire room. Instead of having a sweet spot on the couch, everyone has a clear, balanced listening experience.

Samsung Seamless Codec

With a compatible Galaxy S24 or newer, your music stays in hi-res, even over Bluetooth. Using this special Samsung to Samsung connection, you can keep the detail in your music, even if the Wi-Fi goes out.

Best suited for

Design-Focused

People who value modern, "gallery-inspired" aesthetics for their living spaces, particularly those interested in the minimalist style.

Convenience Seeker

Individuals looking for an easy to set-up experience, featuring Wi-Fi, smart connectivity, and convenient one-touch music listening.

Premium Audio

Consumers who want premium, high-fidelity, multi-dimensional sound that has powerful bass with reduced distortion, driven by AI.
