

Neo QLED — Quick Pitch

Neo QLED TVs are bright with life-like colors for a great picture. Real Quantum Dot tech helps keep colors from washing out in bright scenes.

Plus, these TVs act as a helpful assistant. Just ask your TV to find shows to binge watch, or let it automatically adjust picture and sound settings for what you're watching.

They come in tons of sizes at a great value, making them a go-to for game nights or movie marathons.

A smart choice for quality entertainment, easy-to-use smart features, and sizes that fit your space.

Top 3 reasons

Bright and Life-like

Get **bright highlights and life-like colors** that hold true during bright scenes.

The two together **bring detail and smooth gradients to every scene.**

Big Options, Bigger Value

Offering screen sizes from **43" up to 100 inches.**

The **size options and smart value** make premium entertainment accessible for any room.

Boldly Adaptive

Versatile displays ready for entertainment, movies and sports. The QN80H supports up to **144Hz for smooth motion** during gaming.

Samsung Vision AI helps you find the next show to binge while optimizing your settings based on your content.

Samsung Vision AI

Color Booster Pro

Choose how vibrant your movies, shows, sports, and games look. By using AI to intelligently boost the color based on the content you watch and the setting you choose, the control of your color is in your hands.

Auto HDR Remastering

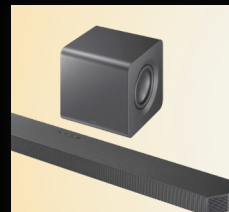

AI takes regular SDR content and automatically enhances it to look more like HDR with depth in dark scenes and highlights that pop. From old shows to live TV or ad-supported streaming plans, it improves your everyday content without needing an HDR source.

Vision AI Companion*

Ask your TV anything and Vision AI will help answer your questions. Find the next show to watch, the next recipe to cook, or the next AI feature to dive into on your Samsung TV.
