

Q Series — Quick Pitch

Q-Series soundbars make shows, movies and games feel immersive, without complicating your setup. Their 3D audio pulls you in, but keeps dialogue clear so you aren't constantly adjusting the volume during quiet moments.

If you have a newer Samsung TV¹, the soundbar syncs with your TV speakers instead of replacing them, creating a much fuller sound.

They're also flexible for your space whether mounted or on a TV stand. You can choose an option with a compact subwoofer, or one with the bass built-in if you want even less clutter.

They make your TV setup feel complete and take the guess work out of getting good sound.

Top 3 reasons

Clear and Immersive

Get 3D sound that pulls you into the action while keeping dialogue crisp and easy to hear.

Choose from a range of performance levels to fit your space, from **simple room-filling sound to a full theater setup** with rear speakers.

Connected Sound

For Samsung TVs with Q-Symphony¹ support, they **sync with the TV speakers** instead of disabling them to improve the dialogue and surround performance.

¹Requires a compatible 2020 or later Samsung TV. See samsung.com for compatibility and details.

Customizable Setup

You have **different options for different spaces**. From Soundbars with a compact subwoofer you can hide, to a bar with the bass built right in.

You even have **convertible options** that adjust their sound when wall mounted or placed on a TV stand for full flexibility.
