

cerasonar

EXCLUSIVE NORTH AMERICAN PARTNER

WHERE SOUND BECOMES APART OF THE ARCHITECTURE

FULL LINE OF INVISIBLE LOUDSPEAKERS

GERMAN MADE // EXCLUSIVELY THROUGH TRUAUDIO

Cerasonar is a German manufacturer specializing in invisible loudspeakers, handcrafted at its facility in Worpswede. The company maintains hands-on quality control throughout assembly and keeps its own warehouse stocked with critical components. Cerasonar has spent about 15 years refining the technology, which only reached market maturity in the last 20 years. The result is a fully invisible speaker that installs directly into walls or ceilings with no cable clutter and no loss of space, using an innovative foam layer less than half an inch (about 0.4 in) thick that can support several coats of plaster without compromising sound quality or requiring labor-intensive sanding. Founded more than 40 years ago by Ulrich Ranke and now run with his sons, Cerasonar remains family-owned and serves clients in more than 31 countries across five continents. TruAudio is Cerasonar's exclusive partner for the North and South American market, meaning customers in North America must purchase Cerasonar products through TruAudio.

A System Built for Every Space

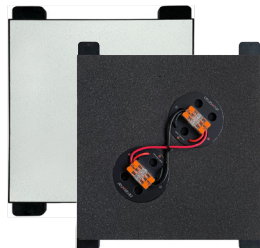

Cerasonar isn't a single product. It's a complete architectural audio platform, engineered so every component works together as one system.

CS-1520 FIT

- Full-range invisible loudspeaker
- 25W RMS (30W Max)
- Inexpensive invisible speaker for commercial applications
- Available in 100V option
- Sold in pairs

CS-2525 FIT

- Full-range invisible loudspeaker
- 50W RMS (100W Max)
- Inexpensive invisible speaker for commercial applications
- Available in 100V option
- Sold in pairs

CS-4062 REFERENCE

- Full-range invisible loudspeaker
- 50W RMS (100W Max)
- Can be wired as a dual voice coil
- Sold in pairs

CS-4080 ULTIMATE

- Full-range invisible loudspeaker
- Hybrid-pneumatic driven
- 75W RMS (150W Max)

CS-4080 REFERENCE PRO

- Full-range invisible loudspeaker
- 150W RMS (300W Max)
- High efficiency for max SPL
- Subwoofer is recommended

CS-4080 SUB

- Invisible subwoofer
- 2x 8" subwoofers
- 4Ω (or 2 @ 8Ω)
- 150W, Max 300W (or 2 @ 75W, max 150W)

CS-6280 SUB

- Invisible subwoofer
- 12"
- 250W RMS (500W Max)
- 4Ω

ACCESSORIES

Placeholders

The Cerasonar placeholder is installed in an early construction phase and clearly defines the future position and exact dimensions of the invisible loudspeaker before walls or ceilings are closed.

- CS-4062PH
- CS-4080PH
- CS-6280PH

CS-PRO

The Cerasonar protection unit pro was developed for the enhanced protection of invisible cerasonar loudspeakers when operated without Cerasonar factory DSP presets.
